

Bio winery Cantina Pizzolato, Villorba \_ Tv

Photo Franco Galiffi

UNDER CONSTRUCTION.

UNDER CONSTRUCTION.

The winery has a long 35-year story notable for its constant increase in production.

The winery is situated in a well constructed, well organised and cultivated location that forms a good quality landscape designed with the articulation of a regular disposition of grapes vines and clay paths. The landscape has within itself and connected with both textural and interwoven features. The material composition and the colouring create almost a unicum. The presence of the Villa, residence of the owner, provides an ulterior element in the composition of the landscapes' s elements.

The new winery offers an opportunity to reorganise and reconnect the system of open spaces with the built-up structures through the restoration of signing, associated modality and materiality that come from the world of agriculture.

*Crediti:*
